

**REMARKS/ARGUMENTS**

The Examiner objected to the specification because of several informalities. Applicant submits herewith an amended specification in two versions, one being a clean version of the amendment and one version showing the changes made. The Applicant submits that the amended specification addresses all of the informalities noted by the Examiner. Furthermore, the Applicant has clarified the descriptions in the specification. The amended application nevertheless contains no new matter.

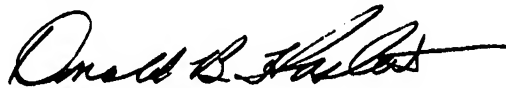

The Examiner objected to the drawings because of formal errors. The Applicant submits replacement drawings herewith which correct the informalities noted by the Examiner and which identify the corrected reference numerals which correspond to the corrections to reference numerals in the specification. In particular, the figure originally labeled Fig. 0 has been deleted and original Figure 5 has been renumbered as Fig. 1. Original Fig. 2 has been deleted and original Figures 1, and 6-9 have been renumbered as Figs. 2, 5-7, respectively. Frames, dimensions, and miscellaneous labels and legends have been deleted.

The Examiner rejected Claims 1-9 under 35 U.S.C. 112 (2), for being indefinite and failing to particularly point out and distinctly claim subject matter. Claims 1-9 have been cancelled.

Applicant submits new claims 10- 15 for examination.

In view of the foregoing amendments and remarks, the Examiner is request to examine the application, to allow Claims 10-15, and to pass the application on to issue.

Respectfully submitted,

---
